LQ6 Series couplings closed-system design provides ultra-reliable, dripless connections and disconnections. The first of their kind, the couplings utilize patent-pending valve technology specifically designed for liquid cooling applications.

Features - Benefits

Non-spill design - Disconnect under pressure with no spills

Redundant sealing when connected - Extra protection from leaks

Color-coding - Instant visual difference in cooling lines

Friction-free valve - Valving system designed for extended periods in connected state

Enhanced latch design - Easy to see orientation on manifolds and tubing

Lower ergonomic profile - Meets size requirements for space-constrained electronics
